

10. (AMENDED) A control device as claimed in [any preceding] claim 1, wherein the two control surfaces rotate about a common axis.

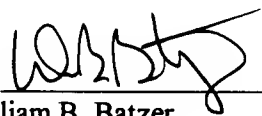

Q 2 11. (AMENDED) A control device as claimed in [any preceding] claim 1, wherein each of the two control surfaces comprises a respective wing-like member which is swept back with respect to the direction of tow of the streamer.

12. (AMENDED) A control device as claimed in any [preceding] claim 1, wherein the body is adapted to be non-rotatably coupled in the streamer.

REMARKS

The present amendment is submitted in order to place the application in better condition for examination on the merits in the USPTO.

Respectfully submitted,

By:
